Dear Mr. Tarr,

I urge you to stop the building of the Atlantic Coast Pipeline. I don't live in the area where it is proposed to be, but I have heard MANY people who do live there tell about what will happen to their farms and homes if this dangerous pipe comes through their precious land. It is especially heinous that the route is proposed to go through areas where the poorest and people (Native, Black) who have the least power. It is sad that when we should be supporting renewable energy that we are still propping up fossil fuels. I am so against this I will be at the DEQ today to let you know.

Jade Dell
